	chapter	1			
1.	Which of the foll	owing description about	OSI layers is incor	ract?	
1.			•	re commonly needed by	users
		<u> </u>		ntics of the information tr	
	C. The network l	ayer controls the operation	•	l determines how packets	
			a raw transmission	facility into a line that	appears free of
2.	The three central	concepts of the OSI mod	del are		
	A. services, inter	faces and protocols	B. arc	hitecture, model and swit	ching
	C. subnet, layerir	ng and port	D. pro	otocols, layers and interf	faces
3.	world and push e	verything else out of their seful. They can be sumn	ir way. This did not narized as following	-	ek at some of the
4.	the first bit of the A. Queuing del	packet onto the outbour ay orward transmission thing		ntire packet before it can b	egin to transmit
5.	320bytes. At each fraction of the ne		g topper and bottom	oplications generate mes layers), an 20byte header	_
	chapter	2			
6.	In thelittle burst of time	•	ırns, each one perio	dically getting the entire	bandwidth for a
	A. FDM	B. TDM	C. WDM	D. CDM	
7.		els are <mark>4 MHz</mark> wide. Hov a noiseless channel.	w many bits/sec can	be sent if sixteen-level di	<mark>ig</mark> ital signals are
	A. 16Mbps	B. 24Mbps C. 32M	Ibps D.40Mbps		
8.	If a binary signa maximum achiev A. 6 kbps		channel whose sign	nal-to-noise ratio S/N is D. 18 kbps	31, what is the
	11. O Rops	D. 12 KUPS	C. 13 Rops	2. 10 Kops	

9.	In packet switching, circuit switching, and message switching, which one does not utilize store-and-forward transmission technology?
	A. packet switching B. circuit switching
	C. message switching D. none of above
	C. message switching D. none of above
10.	Which protocol does not belong to the data link layer?
	A. HDLC B. ICMP C. PPP D. SDLC
11.	Which of the following factors does not affect the channel data transfer rate ()? A. Signal to noise ratio B. Frequency Bandwidth C. Modulation rate D. Signal propagation speed
12.	A noisy channel has a bandwidth of 4 KHZ, its S/N ratio is 511, then its maximum data rate will be
	A. 36 kbps B. 32 kbps C. 63 kbps D. NONEOF ABOVE
13.	Which one can be used as a key component of optical transmission system? A. UTP B. semiconductor laser device C. HUB D. WiFi router
14.	The cable between toll office and the end office of telephone company are known as the A. local loop B. trunk C. microwave line D. coaxial cable
15.	It is impossible for to cause transmission impairments of telephone local loop. A. different Fourier components propagating at different speed B. thermal noise C. crosstalk between two close wires D. multipath fading
16.	An T1 channel contains 24 PCM signals, its data rate is .
	A. 2.048 Mbps B. 1.544 Mbps
	C. 64kbps D. 2.5 Gbps
	chapter 3
	Chapter 5
17.	Bit string 1110111111101 will become after bit stuffing.
	A. 11101111011101 B. 11101111101101
	C. 1110111111101 D. 111011111110101
18.	Which field of PPP frame can be omitted to improve efficiency during frame transmission? A. checksum B. control C. protocol D. length
19.	What is the remainder obtained by dividing x^7+x^5+1 by the generator polynomial x^3+1 ?
	A. 110 B. 011 C. 111 D. None of above

		y port of switch is						
		y port of switch is		•	ber;			
	_	y MAC address is	_		e same layer 3 protocol are assigned the sa	 .		
	VLAN ID;	ch ports sending a	nd receiving pag	yioad of the	e same tayer 5 protocor are assigned the sa	me

20. Which is not a correct method to build VLANs?

29. After the sender first sends frames from 0 to 8 and at the end of timeout receives the acknowledgments for frame 1, 3, and 5, the next frame it will retransmit is frame ______. (assume the protocol is goback-n and the acknowledgment number indicates the last frame number received correctly.)

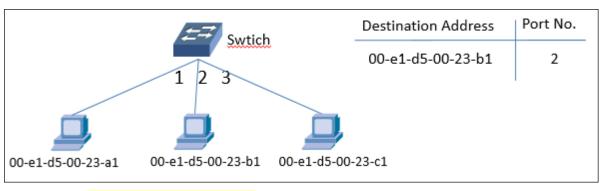

A. 2

B. 4

C. 6

D. 7

- 30. Which is not the CSMA / CA rule of 802.11?
 - A. If station X received RTS of station A, X must remain silent for a short time so that X will not interfere with A's receipt of CTS.
 - B. If station X received RTS, but did not receive CTS, then X can transmit its data and will not interfere with other stations.
 - C. If station X has not received RTS, but received CTS, then X may not transmit its data...
 - D. If station X has received both RTS and CTS, then X may transmit its data.
- 31. When a switch is set up port-based VLANs, which feature is impossible to achieve?
 - A. A port belongs to two different VLANs
 - B. Ports on different switches belongs to a same VLAN
 - C. IP-Sec encryption
 - D. Multicast function
- 32. An Ethernet topology and the current forwarding table of the switch are shown in the following figure. Hosts 00-e1-d5-00-23-a1 send a data frame to host 00-e1-d500-23-c1. After receiving this frame, host 00-e1-d5-00-23-c1 sends host 00-e1-d5-00-23-a1 a confirmation frame. The forwarding ports of the two frames on the switch are ().

- A. {3} and {1}
- B. {2,3} and {1}
- C. {2,3} and {1,2}
- D. {1,2,3} and {1}

-----chapter 5 -----

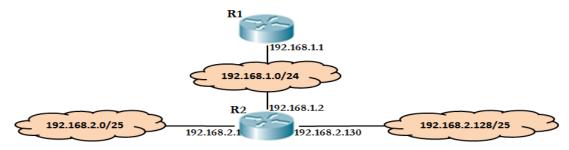

- 33. Which is not the private address that will not appear in Internet datagram?
 - A. 10.3.18.82
- B. 192.168.8.3
- C. 10.0.0.1
- D. 172.33.8.8
- 34. Which protocol is used in command "ping 10.214.8.9"?
 - A. ARP
- B. ICMP
- C. RARP
- D. ECHO
- 35. _____ is not a legal IPV6 address.
 - A. 2A00::1345:A367:892B:24E0
- B. 1382:4567:89AB:CDEF

C. ::124.21.50.48

D. 2A43:0000:0000:0000:0123:4567:89AB:CDEF

36.	RIP is a A. Interior Gate C. static routing	•	. Exterior Gateway Prastate routing protoco	
37.	Which of the follow A. Bridge C. Switch	ing devices is needed	for a packet to be pas B. Roo D. Hu	
38.	A. A router discover B. Measure the dela C. Exchange routing	part of link-state routings its neighbors and lesty or cost to each of its table with its neighbors telling all it has just	arns their network add neighbors. ors.	dresses.
39.	A. 202.101.10.0 th B. 202.101.10.32 th C. 202.101.10.33 th	st range for subnet 22 arough 202.101.10.25 rough 202.101.10.63 rough 202.101.10.62 rough 202.101.10.34		5.255.255.252?
40.	Address 135.46.64.0 135.46.80.0 135.46.128.0 0.0.0.0	owing (CIDR) entries mask 255.255.192.0 255.255.240.0 255.255.224.0 0.0.0.0 nop if a packet with th B. 10.0.0.1	Next hop 192.168.0.1 172.16.0.1 10.0.0.1 123.0.0.1	135.46.125.80 arrives? D. 123.0.0.1
41.	is a dynamic A. RARP B. ARP C. ICMP D. None of the above	22 01	which a MAC address	ss is found for an IP address .
42.	Which utility progra address.? A. traceroute B. ping C. ttcp D. Netstate	nm is designed to find	I the routers along the	e path from the host to a destination IP
43.	The IP protocol prov	vides for servi	ce.	

- A. reliable and connection-oriented
- B. non-routable
- C. unreliable and connectionless
- D. none of the above
- 44. The subnet mask for a network is 255.255.255.224. How many valid host addresses are available? (Disregard special addresses)
 - A. 14
- B. 16
- C. 30
- D. 32
- 45. If a host with IP address 120.10.77.55 and mask 255.255.252.0 wants to send a broadcast packet in its subnet, the destination address of the packet is _____.
 - A. 120.10.76.0
- B. 120.10.76.255
- C. 120.10.77.255
- D. 120.10.79.255
- 46. In the TCP / IP reference model, _____ provides a direct service for ICMP.
 - A. PPP
- B. IP
- C. UDP
- D. TCP
- 47. There is a network as following figure. Router R1 has only a route to subnet192.168.1.0/24. In order to making R1 can route to all subnet in the figure, which routing information (destination network, mask, next hop) should be added in R1:

- A. 192.168.2.0 255.255.255.128 192.168.1.1 B. 192.168.2.0 255.255.255.0 192.168.1.1 C. 192.168.2.0 255.255.255.128 192.168.1.2 D. 192.168.2.0 255.255.255.0 192.168.1.2
- -----chapter 6 -----
- 48. Which of the following does UDP guarantee?
 - A. Sequence numbers on each user datagram
 - B. Acknowledgements to the sender
 - C. Flow control
 - D. None of the above
- 49. Host A sends host B a TCP segment (SYN=1, seq=220) for establishing a connection. Which is the possible segment that host B then correctly sends if host B received the connection request?
 - A. (SYN=0, ACK=0; seq=221, ack=221)
 - B. (SYN=1, ACK=1; seq=220, ack=220)
 - C. (SYN=1, ACK=1; seq=221, ack=221)
 - D. (SYN=0, ACK=0; seq=220, ack=220)

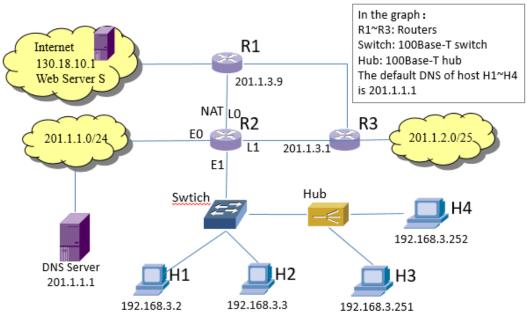

50.	When a host rec	eives a TCP segmen	t with an acknowled	gement nu	imber as 500, it means		
	A. TCP Segment 499 has been received						
	B. TCP Segment 500 has been received						
	C. The bytes u	p to and including 4	99 has been received	l			
	D. The bytes u	p to and including 50	00 has been received	I			
51.	For TCP 3-way	handshake connect	ion establishment, w	hich of th	ne following combination is for the	he	
	second-way (Co	onnection Accepted)	?				
	A. SYN=1,ACK	K=1	В	. SYN=1,	ACK=0		
	C. SYN=-0,AC	K=1	D	o. SYN=0,.	ACK=0		
52.					a timeout occurs. How big will the Assume that the maximum segme		
	A. 9 KB	B. 10 KB	C. 16KB	1	D. 32B		
	t A continuously		P segments, which so	equence nu	umber is 100 and 220. Please answ	er	
53.	How many byte	s of data does the fir	rst segment bring?				
	A. 99	B. 100	C. 120	D. 220	l		
54.	What is the ackr A. 99	nowledgment number	r which host B sends C. 120	after the fi	irst message is successfully receive	ed?

58.	A.POP3 vs	does not match its w	B. Telnet				
	C.FTP vs	21	D. SMTP vs	25			
59.	Which is used to	o keep track of a use	r and its related info	rmation by	the Web server?		

	A. web cache		B. persistent connection				
	C. cookie		D. conditional GET				
60.	HTML tag is u	sed to define a hyp	erlink .				
	A. <input "="" name="'</td><td>'> <u>F</u></td><td>3. 						
	C. <form <="" name="" td=""><td>> I</td><td>O. </td></form>	> I	O. 				
61.	is a small java	a program that has b	peen compiled into binary instruction running in JVM, and can				
	be embedded into HT	ML pages, interpre	ted by JVM-capable browsers.				
	A. JavaScript	B. JavaBean C	Applet D. JSP				
62.	In the following descri	riptions about HTT	P, which one is not correct?				
	A. HTTP uses non-pe	rsistent connection	s in its default mode.				
	B. HTTP uses TCP as	s its underlying tran	sport protocol.				
	C. HTTP is a stateles	s protocol.					
	D. HTTP is client-ser	ver architecture.					
63.	When a user clicks on	a hyperlink, http://v	www.zju.edu.cn/lib/index.html, the browser carries out a series				
	of steps in order to fe	tch the page pointed	d to. Which one is not in these steps?				
	A.) The browser det	ermines the URL					
	B.) The browser ask	B.) The browser asks DNS for the IP address of www.zju.edu.cn					
	C.) The browser sen	C.) The browser sends a UDP request asking for file /lib/index.html					
	D.) The browser disp	plays all the text in	index.html				
64.		to improving per	been its undoing. Servers, routers, and lines are frequently formance of accessing Web pages, we can use following				
	A. caching	B. server re	eplication				
	C. tunneling		delivery networks				
65.	Which protocol is possible homepage?	erhaps not to be u	sed when using a browser to access a university Web site				
	A. PPP B. AR	P C. UDP	D. SMTP				
	chapter 8						
66.	Cipher block chaining	g can be used to pre	event attack to				
	A. RSA B. AE	C. SHA-1	D. PGP				
67.	A. The sender's publi B. The sender's priva	c key te key	using public-key cryptography?				
	C. The receiver's pub	-					
	D. The receiver's priv	rate key					
68.	Which key is the brow	wser used to verify	the certificate of the website?				

A. The public key of the website

	B. The private	e key of the browser					
	C. The public	key of the CA					
	D. The private	e key of the website					
69.		r entering into a bus control cation		m you are talking to before revealing sensitive	ve		
70.	The main pub	lic-key algorithm is		which derives its strength from the fact th	ıaı		
	it is very diffi	cult to factor large n	umbers.				
	A. DES	B. AES	C. MD5	D. RSA			
2x1	0^8 m/s.	-	-	00km. Signal propagation speed in the media in rate is 100kbps, then the transmission delay D. 100s			
	A. 15	B . 103	C. 10s	D. 100s			
72.	If the data length is 10^7 bits and the data transmission rate is 100 kbps, then the propagation delay is						
	A. 10s	B. 1s	C. 50ms	D. 5ms			
73.	If the data leng	gth is 10^3 bits and the B. 1s	data transmission ra C. 1ms	ate is 1Gbps, then the transmission delay is D. 1μs			
74.	If the data leng	If the data length is 10 ³ bits and the data transmission rate is 1Gbps, then the propagation delay is
